

Topic/Title:

Unordered List || Anchor Tag || Image Element ||

Keywords/Questions:

Notes:

An unordered list starts with the `` tag. Each list item starts with the `` tag.

An ordered list starts with the `` tag. Each list item starts with the `` tag.

The unordered list will show bullet points where the ordered list show numbers and Alphabets. A nested list in HTML is a list that contains other lists within its list items.

The `<a>` tag defines a hyperlink, which is used to link from one page to another.

The most important attribute of the `<a>` element is the `href` attribute, which indicates the link's destination.

`Click here to open Google` = this is a active hyperlink

`` here `src` is the source of the image and the `url` is the location of the image. Image element is also a void element because it don't have a closing tag.

`Alt` attribute is the alternative text description.

Summary:

<https://developer.mozilla.org/enUS/docs/Web/HTML/Element/a> = Check this link to know more about Anchor Tag

So this is it we have done with the list, anchor tag, and image element if you want to know more about these then

just go to google, type MDN docs "type what you want to know".
